September 14, 1987

Mr. Harmon C. McAllister  
Associate Research Director  
The Council for Tobacco Research  
U.S.A., Inc.  
900 Third Avenue  
New York, NY 10022

Dear Mr. Harmon C. McAllister:

I am writing to request your support for the 1988 FASEB Summer Conference on "Receptors" to be held August 7-12, 1988 in Saxton's River, Vermont. This conference which has been held every other year since 1982 has enjoyed growing success and international recognition. It attempts to cover a broad range of issues that all are encompassed by receptor biology. The conference aims to bring together an international group of experts as speakers to discuss recent breakthroughs, current controversies and future directions in areas such as receptor structure, genetic and pharmacologic regulation of receptors, signal transduction, and the roles of receptors in the actions of hormones, neurotransmitters, the immune response, growth and differentiation and oncogenesis. The central importance of this field and the success of the previous receptor conferences has enabled Dr. Marc Caron and myself to already assemble an outstanding group of invited speakers and session chairmen. I am enclosing a list of the tentative schedule as of September, 1987.

As you know it has been progressively more difficult to obtain U.S. Government support for such Conferences and I therefore hope you will be able to make as generous a contribution as possible. We will, of course, acknowledge your support in the program.

Sincerely,

Richard D. Klausner, M.D., Chief  
Cell Biology and Metabolism Branch  
National Institute of Child Health  
and Human Development

RDK/kmp
